IDEATION PHASE — ARTIFACT 02

Define Problem Statement

The Luminary Heritage Resort — Operations & Guest Experience Bottlenecks

1. CORE PROBLEM STATEMENT

> *"High-value luxury guests at The Luminary Heritage Resort currently experience fragmented service delivery, front-desk check-in delays of up to 22 minutes during peak hours, and inconsistent personal preference realization. This stems from disconnected legacy PMS modules, manual paper-based housekeeping coordination, and isolated Point-of-Sale systems."*

2. IMPACTED STAKEHOLDERS & PAIN POINTS

Resort Guests (Luxury Segment)

- Lengthy check-in queues after long travel.
- Repeatedly communicating dietary & room preferences.
- Lack of real-time visibility into amenity & spa bookings.
- Inconvenient physical key carrying and loss risk.

Front Desk & Concierge Team

- Manual key card coding and identity verification.
- Data silos leading to embarrassing guest mix-ups.
- High volume of phone calls for basic status updates.
- Inability to upsell experiences proactively.

Housekeeping & Maintenance

- Radio-based status calls causing guest noise disturbance.
- Delayed room readiness updates causing guest wait times.
- Uncoordinated VIP arrival notifications.

Resort Management & Executive Team

- Inaccurate real-time occupancy and revenue analytics.
- Revenue leakage due to unbilled POS charges.
- Inability to track team response time KPIs.

3. VISUAL ROOT CAUSE ANALYSIS (5 WHYS DIAGRAM)
