PROJECT DESIGN PHASE — ARTIFACT 09

Proposed Solution Overview

The Next-Gen Luminary Heritage Resort Property Management Platform

1. PLATFORM MODULES & ECOSYSTEM

The proposed solution is a unified, cloud-native resort management ecosystem that bridges guest self-service mobile tools with high-efficiency back-office operations.

Guest Mobile App

Keyless BLE door unlock, pre-arrival registration, in-villa dining, and amenity scheduling.

Front Desk & CRM

360-degree guest profile, single-click check-in, real-time room status, and folio billing.

IoT & Housekeeping

Automated dispatch based on guest departure triggers and motion sensor verification.

2. UI WIREFRAME & INTERFACE CONCEPT
